PRINT DATE: 29 June 2009

HAZARD IDENTIFICATION:

Hazardous Substances & New Organisms Act (HSNO) 1996 & Classification Regulations 2001 for this concentration:

- | | |
|--|---|
| 6.1E May be harmful if swallowed or skin contact occurs. | 6.5B May cause an allergic skin reaction. |
| 6.3A Causes skin irritation. | 6.9B May cause damage to body organs. |
| 6.4A Causes eye irritation. | 9.1B Toxic to aquatic life with long lasting effects. |
| 6.5A May cause allergy or asthma symptoms or breathing difficulties if inhaled | |

Cleaning Products Subsidiary Hazards Group Standard: HSR No 2530

COMPOSITION/INFORMATION ON INGREDIENTS:

Alkyl(C12 – C16)dimethylbenzyl ammonium chloride (CAS# 68424-85-1) & didecyldimethyl ammonium chloride (CAS# 7173-85-1)	4.25 %
pH stabiliser and water conditioning agent	2 - 10 %
Proprietary surfactant and solvent blend	2 – 10 %
Water, perfume, and colouring	> 50 %

FIRST AID MEASURES:

Contact with eyes:	Rinse eyes with running water holding back eyelids for 5 minutes. If irritation persists seek medical advice.
Contact with skin:	Wash affected area with copious volumes of water. If clothing is contaminated, remove and wash the affected skin area. If irritation or swelling occurs, seek medical advice.
After inhalation:	A non-volatile compound in normal use. But if subject to vapourisation remove the patient from exposure to a restful location and seek medical advice if symptoms persist. If clothing is contaminated, remove and wash before reuse.
After ingestion:	Do Not Induce Vomiting. Administer 2 glasses of water or milk and seek medical advice if discomfort persists.
Advice to Doctor:	Treat the patient for exposure to material with mild toxic effects. Have this SDS or a product label on hand.

FIRE FIGHTING MEASURES:

This product is neither flammable nor combustible.
Drums subject to the heat of a prolonged fire may explode or erupt scattering contents with possibility of enhancing combustion. Where possible remove drums and containers from the path of a fire, or cool with water spray.
Firefighters may use water spray, jet, fog, foam, CO₂, or dry chemical powder to extinguish a fire in the vicinity.

ACCIDENTAL RELEASE MEASURES:

Spills on floors will produce a slippery surface. Signage preventing foot traffic should be erected where appropriate.
Minor spills (less than 100 litres) should be contained from drainage, diluted with water, neutralised where appropriate, and removed with mops, or absorbed with Mineral Sponge, rags, paper, sand, or soil. It may be possible to drain small spills to town wastewater services where permitted by local authorities.
Large spills (drums and IBCs) should be contained from local drainage with any suitable bund or barrier. Clean up with absorbent material such as Mineral Sponge, paper, rags, sand or soil. Where a liquid suction cleaning machine is available, it should be used only after neutralising the spilt product.

HANDLING AND STORAGE:

Store containers in sites where they can be kept cool and dry and away from heat sources. Liquid products in drums and carboys must have secure closures which fit.
Handle to prevent damage to containers. Should packaging be damaged, repack into clean and dry containers of the same type and mark the product name carefully on an easily seen location on the container.
After use, always replace lids and caps and return to safe storage as soon as possible.

EXPOSURE CONTROLS/PERSONAL PROTECTION:

Exposure controls:	No data is available for Crest Antiviral Sanitiser.
Eye protection:	Safety glasses.
Protective clothing:	Chemically impregnable gloves, protective work clothes (a coat, apron or overalls).
Respiratory protection:	Not required for the regular use of this product. If the liquid is being vaporised, safety eye glasses, a face shield, or respirator may be required.
Ventilation:	Where spraying or vaporising is being carried out, ensure there is ready access to eyewash units and safety shower. Also ensure adequate ventilation is provided in the work space.

PHYSICAL AND CHEMICAL PROPERTIES:

Appearance	Clear pink coloured liquid	
Odour	Fresh rosy fragrance	
pH	7.5 ± 0.5	
Flash Point	> 100° C	
Ignition Point	Not applicable	
Specific Gravity	1.00 ± 0.01	
Refractive Index	1.347 ± 0.005	9½ Bx
Viscosity	Not applicable	
Relative Foam	Medium	
Solubility in water	Completely in all proportions.	

STABILITY AND REACTIVITY:

Crest Antiviral Sanitiser is considered stable under normal storage conditions.
 Avoid contamination with oxidising substances.
 Hazardous polymerisation will not occur.
 Combustion of this product will release oxides of carbon and nitrogen.

TOXICOLOGICAL INFORMATION:

No data is available for Crest Antiviral Sanitiser.

ECOTOXICOLOGICAL INFORMATION:

No data is available for Crest Antiviral Sanitiser.

DISPOSAL CONSIDERATIONS:

Minor spilled liquids (after neutralisation) may be disposed of through town wastewater systems where these are authorised for industrial use.
 Major spills, which have been collected by machine or on absorbants, should be disposed of by waste disposal experts in accordance with local regulations.
 Used containers should be rinsed, not recycled, but disposed of in landfill or incinerated.

TRANSPORT INFORMATION:

NZ Land Transport Rule: Dangerous Goods Rule 2005 Not classified as a dangerous good for Land Transport in New Zealand

NZ REGULATORY INFORMATION:

Hazardous Substances Act (HSNO) 1996 & Classification Regulations 2001:

6.1E May be harmful if swallowed or skin contact occurs.	6.5B May cause an allergic skin reaction.
6.3A Causes skin irritation.	6.9B May cause damage to body organs.
6.4A Causes eye irritation.	9.1B Toxic to aquatic life with long lasting effects.
6.5A May cause allergy or asthma symptoms or breathing difficulties if inhaled	

Cleaning Products Subsidiary Hazards Group Standard: HSR No: 2530.

OTHER INFORMATION:

Formulation reference and version number: R10 – 140 Version 1.
 This SDS was prepared from data available on 20 June 2009.
 This SDS was printed on 29 June 2009
 This SDS will be reviewed no later than 20 June 2014.
