

Clearly Cleaner

Pure Water Window Cleaning

CrestClean's Pure Water Window Cleaning provides cost effective window cleaning solutions for buildings up to 4 stories high.

We use the latest carbon fibre poles and pure water technology to clean external windows. Our carbon fibre poles can extend to 10 metres, allowing us to clean high windows from ground level, without using ladders or lifting platforms. Our personnel are fully trained, and follow strict Health and Safety procedures.

- External window cleaning up to 4 stories high without using ladders or costly lifting platforms.
- Chemical-free Pure Water Window Cleaning system.
- Health and Safety compliant service, covered by \$20 million of Public Liability Insurance.
- All personnel are Security Vetted and uniformed with ID Badges.

Mineral deposits in tap water create a visible layer once the water evaporates. They're annoying when you've just cleaned your car and you see white spots everywhere. CrestClean's Pure Water Cleaning System eliminates this problem, creating clearly cleaner windows, without spots or streaks.

The latest carbon fibre extendable poles make it easy to clean windows up to 4 stories high without using costly lifting machinery or abseiling gear. This also minimises the chance of property damage from ladders and heavy equipment.

Pure Water Chemical-Free Window Cleaning

No chemicals are used with pure water cleaning, which is both economical and environmentally responsible. Water becomes more aggressive the purer it gets and is a natural detergent that helps loosen the bond of dirt from the glass at an ionic level.

Clean up to 4 stories high without costly lifting machinery or abseiling gear

With the latest Carbon Fibre extendable poles we can clean windows up to 4 stories high without using platforms or ladders. No power is required, only a hose tap...and there is no chance of property damage from ladders and heavy equipment.

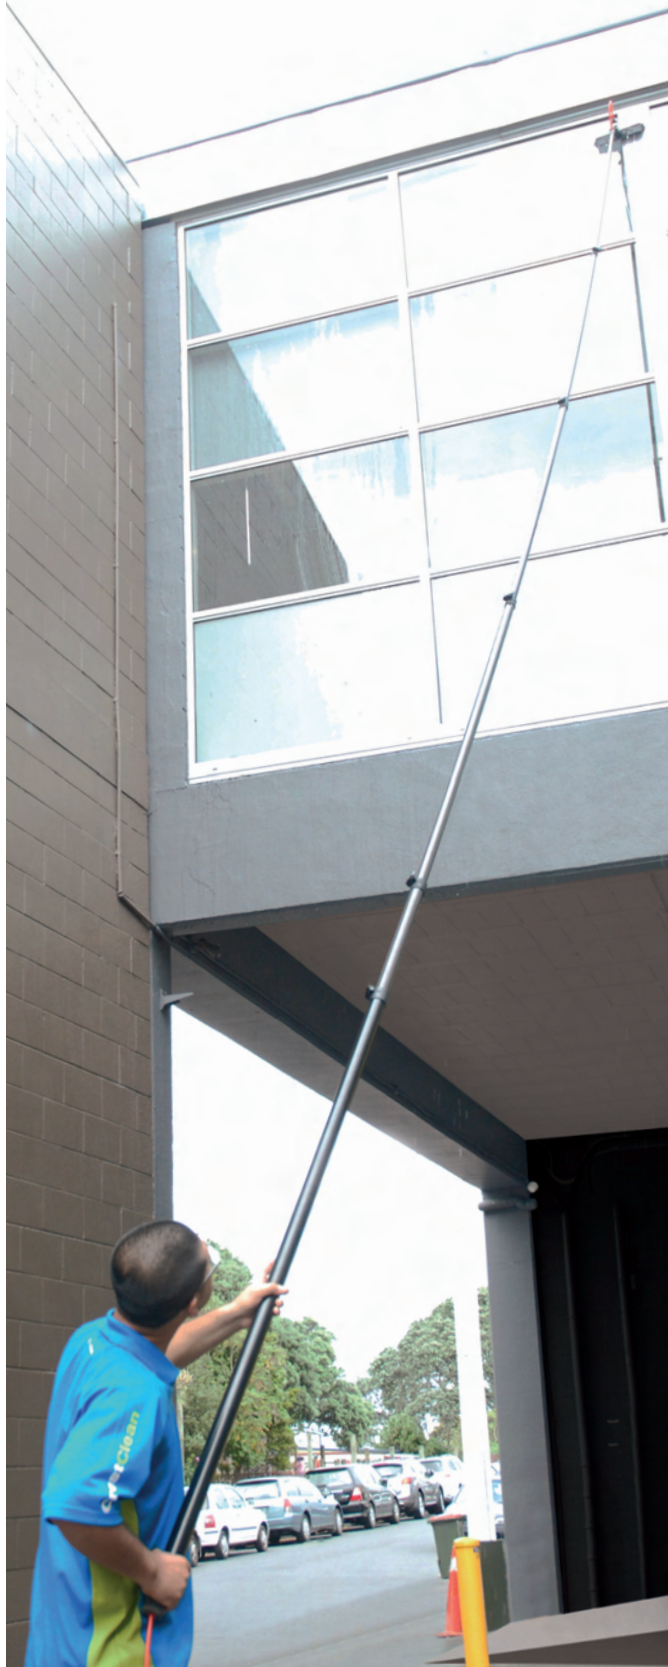

Personnel trained by Master Cleaners Training Institute

All CrestClean personnel receive professional industry training, including specific Health and Safety training in Safe Working Procedures. See www.mastercleaners.org.nz

Health and Safety Compliant

Risks and hazards are dramatically reduced when compared with conventional window cleaning processes. Our operators work from the ground using carbon fibre poles. We do not work from heights, or use ladders or platforms. All activities are conducted under CrestClean's Health, Safety and Environmental Management Systems.

Pure Water Window Cleaning produces great results for our customers. Let us show you how to make your windows clearly cleaner as well.

CrestClean maintains Contractor Prequalification status with CPNZ Ltd. See www.prequal.co.nz
